Nexora SEO / GEO

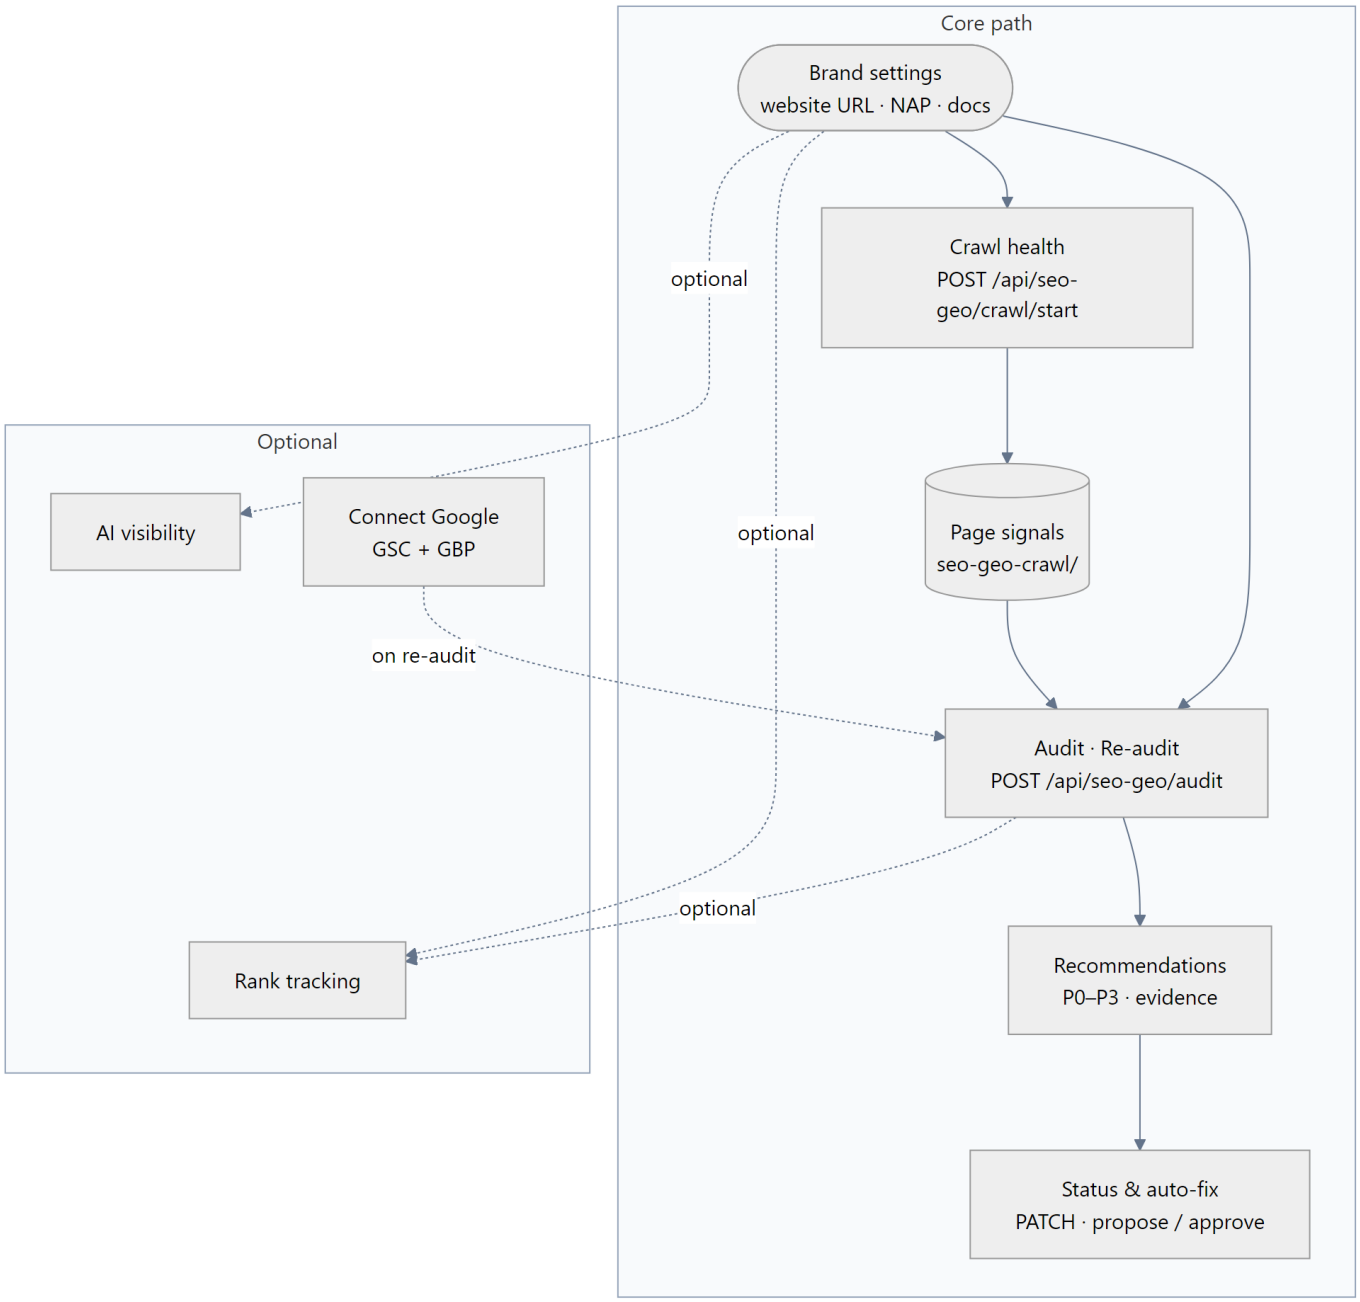

Flow guide — Attract · SEO / GEO

Professional flow diagrams for product and engineering. Credentials, billing, and OAuth setup are out of scope.

Contents

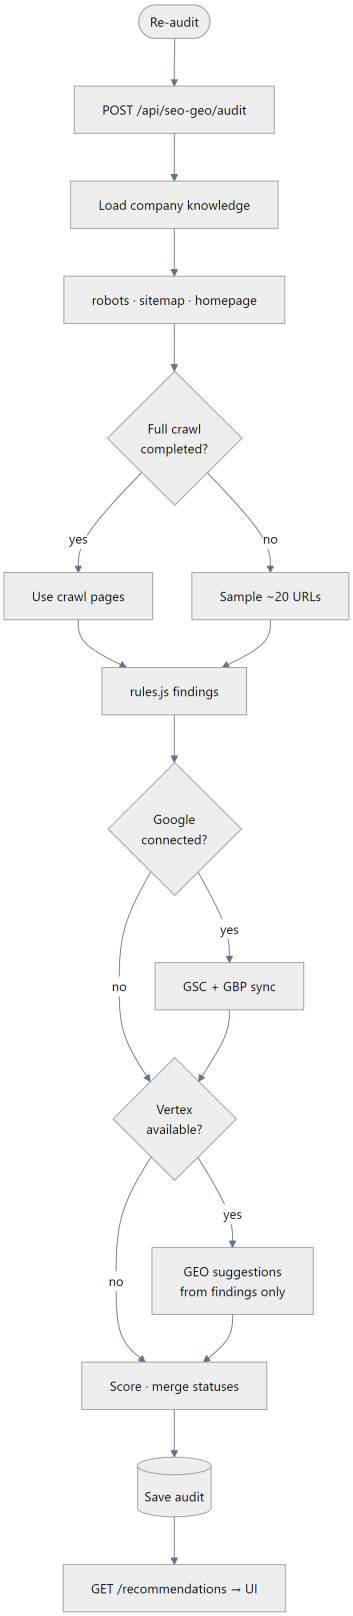

1. End-to-end overview	01-overview
2. Audit engine	02-audit-engine
3. Full-site crawl job	03-crawl-job
4. Rank tracking	04-rank-tracking
5. AI visibility (GEO)	05-ai-visibility
6. Auto-fix	06-auto-fix
7. UI tabs and API routes	07-ui-api
8. Google OAuth (optional)	08-google-oauth

1. End-to-end overview

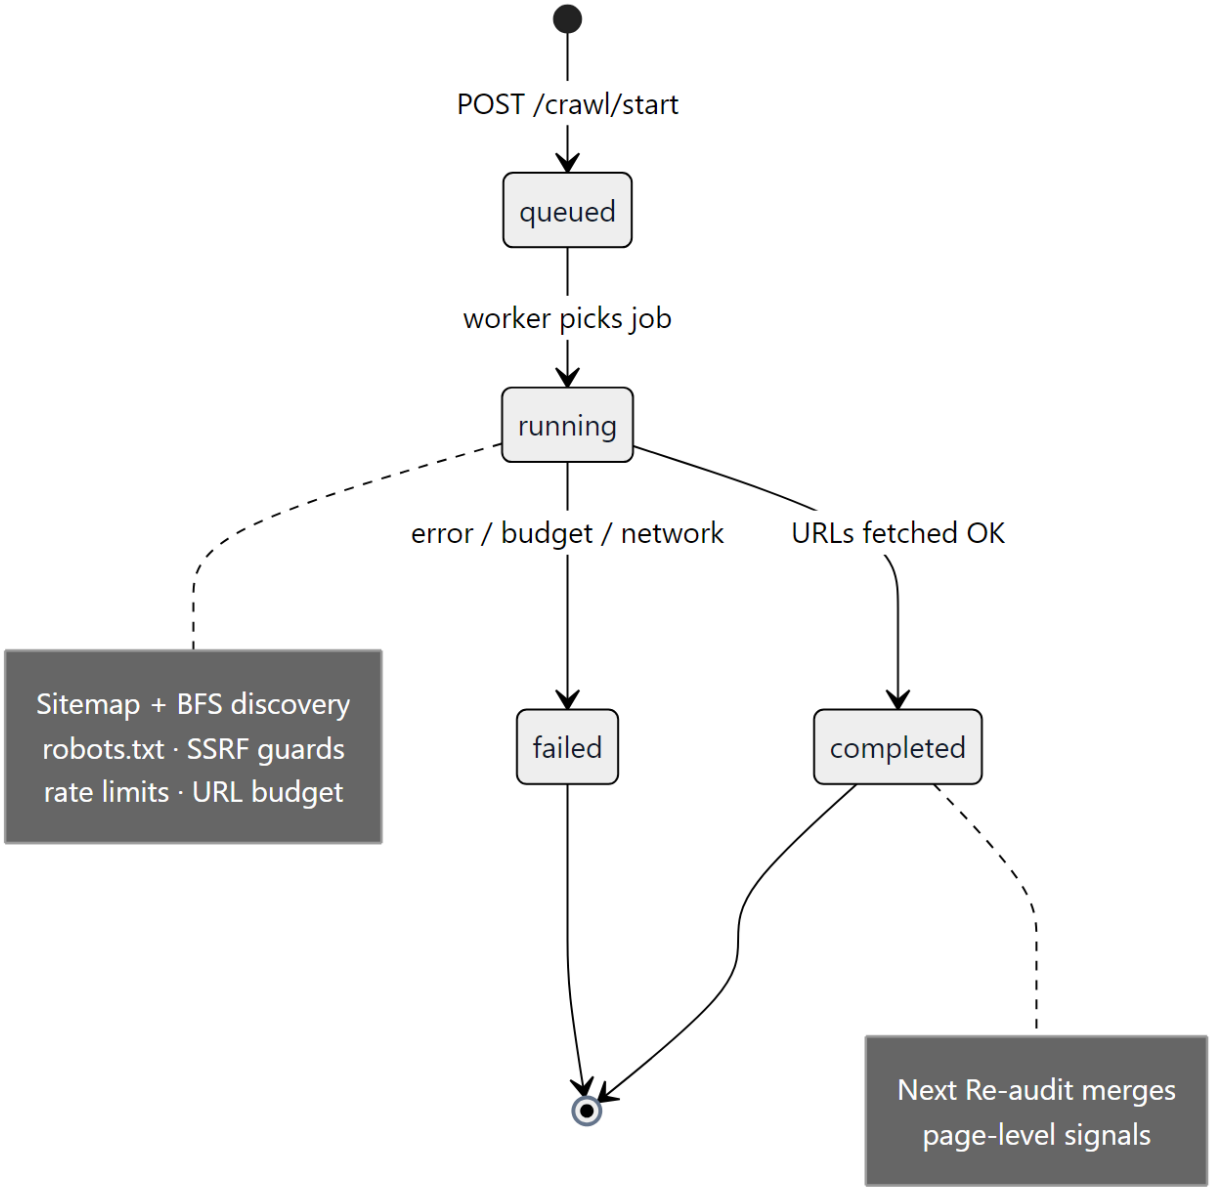

Brand → crawl → audit → recommendations; optional rank, AI visibility, and Google connect.

2. Audit engine

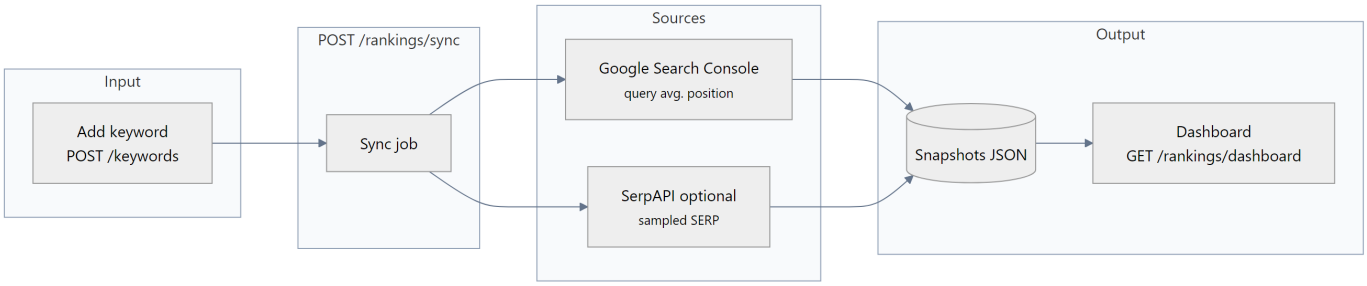

What runs on each Re-audit: crawl signals, rules, Google evidence, optional Vertex GEO suggestions.

3. Full-site crawl job

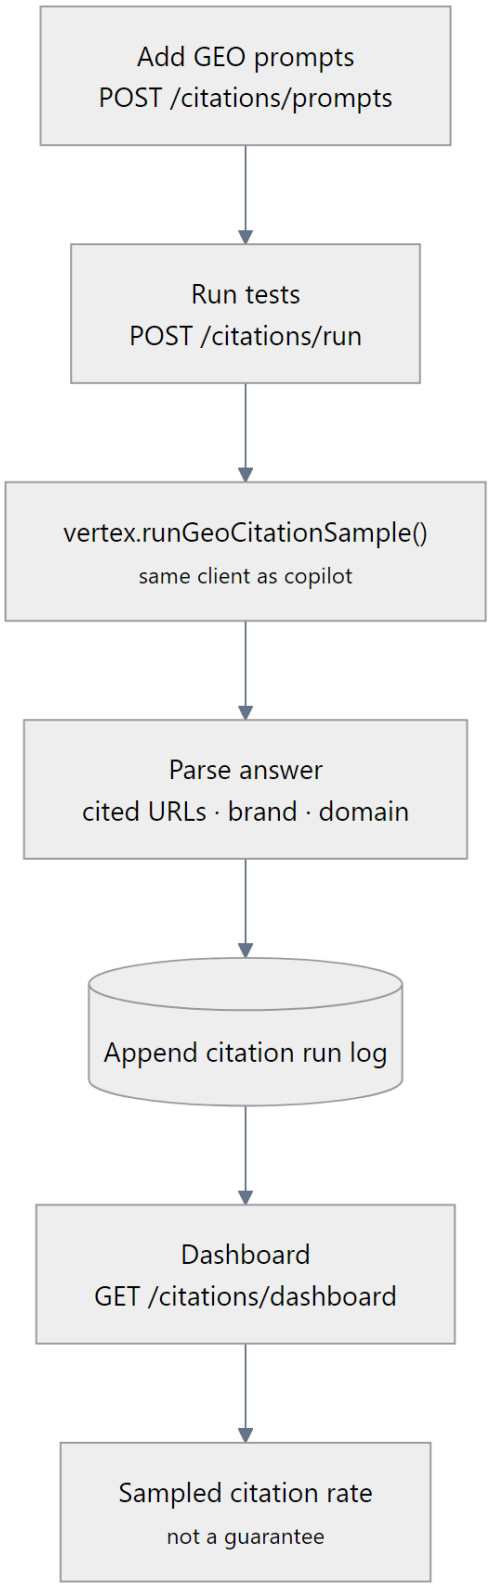

Async job states and how completed crawls feed the next audit.

4. Rank tracking

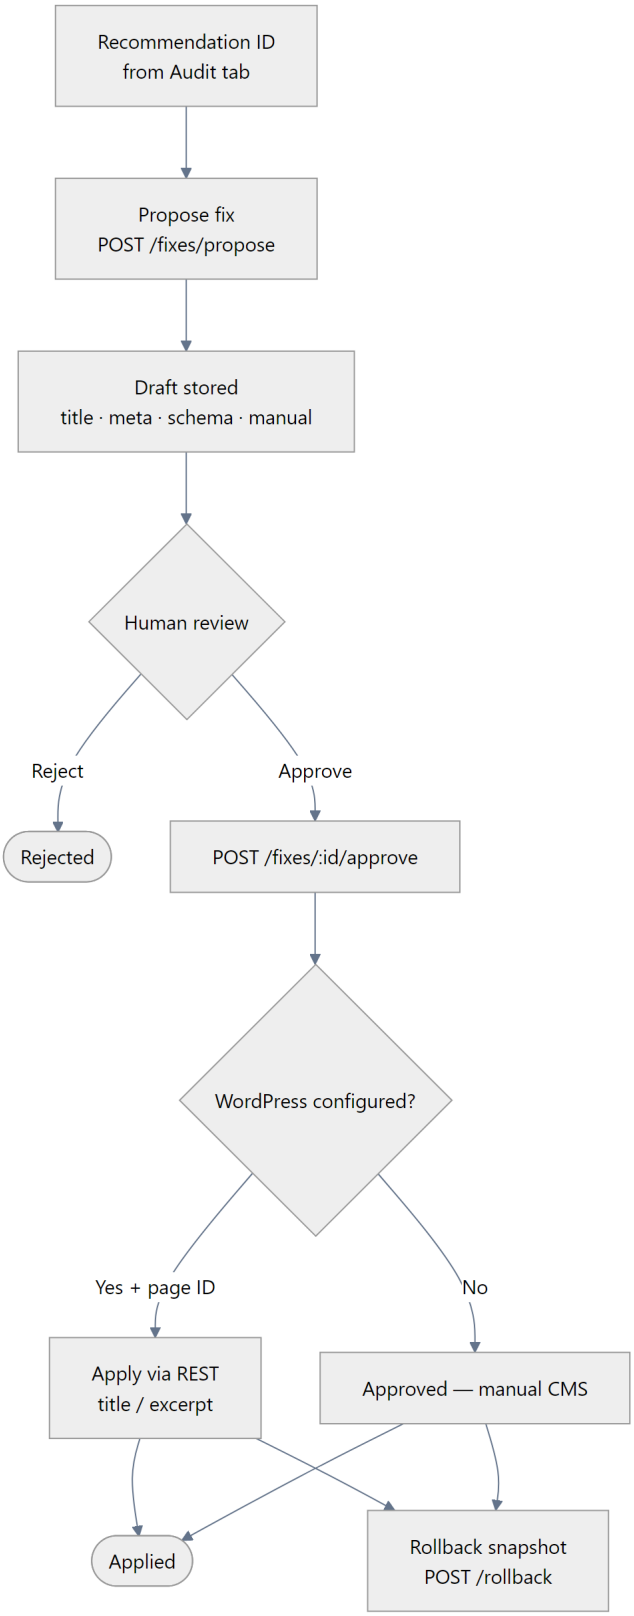

Keywords, sync from GSC and optional SerpAPI, dashboard snapshots.

5. AI visibility (GEO)

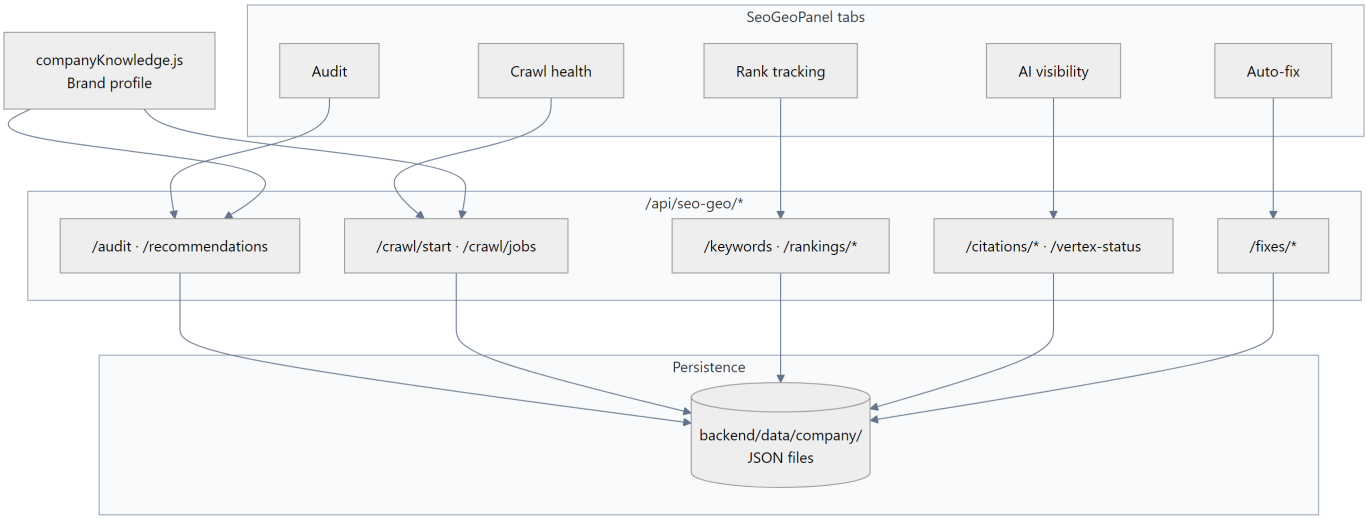

Prompts, Vertex sample runs, citation dashboard (sampled, not guaranteed).

6. Auto-fix

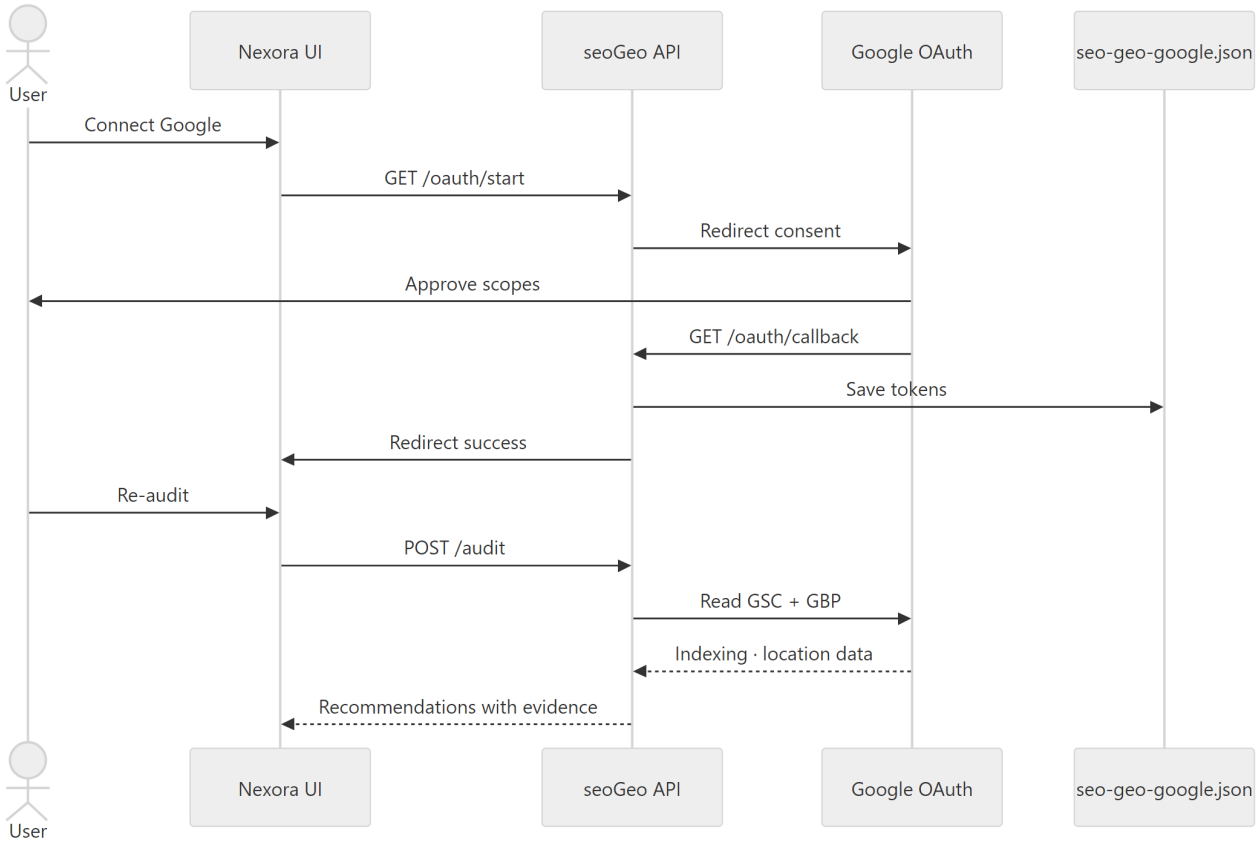

Propose → review → approve; WordPress apply or manual CMS; rollback record.

7. UI tabs and API routes

How each tab maps to /api/seo-geo endpoints and JSON storage.

8. Google OAuth (optional)

Sequence for GSC + GBP connect and evidence on re-audit.

Evidence-based SEO/GEO — not a ranking, traffic, or universal AI visibility guarantee.
